

Reversible Cables

workshop outline

Topics covered

Participants will work through a number of different swatches for reversible cables to learn how they are constructed. Together we will look at how changing their component stitches affects the overall pattern, and then consider how they can be used with shaping and integrated into garments and accessories.

Class structure

This is a 3hr teacher led class. I will demonstrate a number of techniques, and participants will start by working through the examples provided in the class handouts.

Materials and equipment

Either several balls of around 50g or a 100g skein of yarn and the appropriate sized straight needles are required. Participants are advised to bring extra notions, such as tape measure, crochet hook, tapestry needle and so on.

Handouts

Workshop notes covering all of the techniques, including charts and illustrated tutorials where applicable will be provided.
